### **I - INTRODUCTION**

This report was prepared by the Minerals Management Bureau (MMB) within the Trust Lands Management Division and contains information gathered by the Bureau regarding State of Montana mineral leases. The report provides production and revenue information for each lease type managed by the Bureau. Within each lease type, there are reports providing income by county, area office, and grant. The revenue and pricing information was compiled using the cash basis method of accounting. Production information was compiled using information reported on DNRC Form 5s for each royalty month.

For questions or additional information contained in this report, contact Kirk Leikam by phone at (406) 444-4561 or e-mail at [kleikam@mt.gov](mailto:kleikam@mt.gov).

\* Non-Trust Land income consists of revenue the Department of Natural Resources and Conservation collects as an administrator for various entities. These funds are distributed to the entity upon collection.

\*\* Pursuant to Chapter 418, Montana Session Laws of 2001 (SB495), common school mineral royalties are deposited into the guarantee account and distributed.

### III - LEASES

In FY 2005, higher oil and gas prices resulted in a significant increase in leasing activity on state lands. The number of mineral leases in FY 2005 increased 17.2% percent to 3,431, compared to 2,988 in FY 2004. Oil and gas leases increased 15.7 percent in FY 2005 to 3,300, 575 of which are currently producing. The overall number of producing mineral leases increased 4.19 percent in FY 2005 when compared to FY 2004. The schedule below summarizes lease types and corresponding acreages.

MMB activities related to existing leases include collecting royalty and rental payments, auditing, reviewing and approving assignments and tracking working interest ownership; reviewing and preparing for approval communitization agreements and unit operating agreements; and coordinating with field offices the review and approval of all proposed physical operations on state leases.

\* Small Volume Permits and Permits to Test for Aggregate are not included. During FY05, DNRC field offices issued 18 Small Volume Permits and 0 Permits to Test for Aggregate.

\*\* Receive advance royalties, but none of the current metalliferous leases are actually producing minerals.

NOTE: Producing leases, licenses and permits are described as follows:

**Gravel Permits** - Includes permits that produced or paid royalties during the fiscal year. Does not include small volume or test permits.

**Coal Leases** - Includes leases that produced during the fiscal year. Does not include advance royalties.

**Land Use Licenses** - Includes salt water disposal where we received royalties or advance royalties.

**Metalliferous Leases** - Includes leases that produced during the fiscal year. Does not include advance royalties.

**Non-Metalliferous Leases** - Includes leases that produced during the fiscal year. Does not include advance royalties.

**Oil and Gas Leases** - Includes any lease with a well that is capable of production.

## IV - OIL AND GAS LEASES

Oil and gas prices continued to rise during FY 2005, resulting in significantly higher production and revenues compared to FY 2004. The average price for a barrel of oil increased 44.1 percent from \$31.02/bbl in FY 2004 to \$44.69/bbl in FY 2005. Gas prices increased 28.8 percent over FY 2004 for an average price of \$5.09 per mcf. In FY 2005, active oil and gas wells reported 1,400,063 barrels of oil produced; 7,240,046 MCF of gas and 1,037,569 gallons of condensate. Oil production increased 25.9 percent from FY 2004, while gas production levels increased 26.4 percent when compared to FY 2004. Below are two graphs that provide a five-year summary of oil and gas production, revenue and average prices.

Production from coalbed methane wells increased 231.4 percent in FY 2005 to 1,812,952 mcf, compared to 547,057 mcf produced in FY 2004. The state received royalties for 63 CBM wells in FY 2005. All production reported was from wells in Big Horn County. CBM revenue and production amounts are included in the gas totals for this report.

## VI - COAL LEASES

Coal production decreased 4.9 percent in FY 2005 from 3,720,126 tons mined compared to 3,911,826 tons mined in FY 2004. All coal reported was produced from state leases in Big Horn County. In FY 2005, Spring Creek Coal Company produced 3,255,510 tons, while the remainder of 464,616 tons was produced by Decker Coal Company. The Coal Production and Revenue graph below is a five-year summary of coal revenue, production, and prices reported on State Trust Lands. The volume of coal mined can change significantly from year to year, as mining activity moves onto or off state land within the normal sequence of mining operations.
